one of the biggest challenges for companies in today s competitive environment is to get products to customers when and where they need it exactly the way they want it with a competitive price and in a cost effective manner managing the value

chain is becoming more complicated because of globalization outsourcing the need for shorter time to market and the requirements for greater responsiveness and flexibility due to customer changes although the benefits of applying lean concepts or improving the flexibility of a value chain are clear and desperately needed in today's competitive environment none of the current literature provides guidance on how to do this lean agile value chain management fills that gap by providing a breakthrough start to finish roadmap for organizations to implement a lean and agile value chain transformation program successfully it brings together the field's latest advances and offers practical proven tactics and detailed guidance into every aspect of value chain process redesign including mapping the existing process intelligently leveraging new technologies building a strategy for strengthening the relationship with suppliers and customers identifying comprehensive related metrics and much more

this textbook presents global supply chain and operations management from a comprehensive perspective combining value creation networks and interacting processes it focuses on the operational roles in the networks and presents the quantitative and organizational methods needed to plan and control the material information and financial flows in the supply chain each chapter of the book starts with an introductory case study numerous examples from various industries and services help to illustrate the key concepts the book explains how to design operations and supply networks and how to incorporate suppliers and customers as matching supply and demand is a core aspect of tactical planning the book focuses on it before turning to the allocation of resources for fulfilling customer demands providing readers with a working knowledge of global supply chain and operations management this textbook can be used in core special and advanced classes therefore the book targets a broad range of students and professionals involved with supply chain and operations management special focus is directed at bridging theory and practice

more and more often practitioners in process industry have to adapt their global production networks to changes in the competitive environment a majority of the supply network design models proposed by academia does not sufficiently capture the economic and technical questions that have to be resolved this work seeks to provide the necessary operations research decision support tools it builds on the example of specialty chemicals industry which faces a strong increase of competitive pressure and historically grown production networks that typically lack a coherent design strategy decision makers have to define a global production network re design strategy therefore the book proposes a planning process split into the two phases global production network optimization and individual site selection to support the former a comprehensive mixed integer linear programming model is proposed while an approach based on the analytic hierarchy process is suggested for the latter findings from a case study demonstrate the applicability of or methods to real world production networks

erp the dynamics of supply chain and process management is a complete updating and expansion of avraham shtub s award winning 1999 text enterprise resource planning erp the dynamics of operations management new chapters written together with his co author reuven karni cover enterprise process modeling design of business processes a complete revision of the original chapter on the integrated order fulfillment process using erp business process management business process improvement and a new appendix on simulating process life cycles using serious games as teaching aids merptm is designed to facilitate the teaching of integrated operations of a business organization with a focus on corporate performance management it reflects a fully live environment and allows students to participate in a virtual organization made real and dynamic as minute by minute business events and conditions unfold this book is ideal for use in academic and executive programs aimed at teaching students how integrated systems work it is suitable as a textbook for the basic mba operations management course or as a text for courses on erp systems and the development of business processes in an industrial engineering program it could serve to give students their first and perhaps only introduction to business issues like market demand and supplier relationships i

used avy shtub s award winning 1999 book on erp and the accompanying operations trainer software in several leading mba programs in the united states and europe most of the courses were delivered in traditional classroom settings but some of them were offered fully online the current revision and second edition of the book co written with reuven karni adds new materials with an emphasis on services and business processes provides excellent detailed examples and revises old ones of the previous edition the book is nicely complemented and enhanced by the addition of a unique dynamic online simulation package merptm that represents a major upgrade to the old pc based operations trainer in my reading the book s first main theme integrated production and order management ipom is a different and perhaps more valid take on the many issues associated with supply chain management the authors touch on all facets and issues of operations and supply chain management and provide a theory based and sound practice proven approach to the problems present in any organization the second main theme covers the design and improvement of enterprise and business processes touching on facets and issues relating to process based enterprise management i would highly recommend the book and the accompanying software to any instructor teaching operations supply chain management business process management or industrial engineering gyula vastag corvinus university of budapest hungary
