ideas very differently than english grammar does drawing on the wari language of brazil everett explains that speakers of all languages in constructing their stories omit things that all members of the culture understand in addition everett discusses how some cultures can get by without words for numbers or counting without verbs for to say or to give illustrating how the very nature of what s important in a language is culturally determined combining anthropology primatology computer science philosophy linguistics psychology and his own pioneering and adventurous research with the amazonian pirahã and using insights from many different languages and cultures everett gives us an unprecedented elucidation of this society defined nature of language in doing so he also gives us a new understanding of how we think and who we are
