hybridity and its discontents explores the history and experience of hybridity the mixing of peoples and cultures in north and south america latin america britain and ireland south africa asia and the pacific the contributors trace manifestations of hybridity in debates about miscengenation and racial purity in scientific notions of genetics and race in processes of cultural translation and in ideas of nation community and belonging the contributors begin by examining the persistence of anxieties about racial contamination from nineteenth century fears of miscegenation to more recent debates about mixed race relationships and parenting examining the lived experiences of children of mixed parentage contributors ask why such fears still thrive in a supposedly tolerant culture the contributors go on to discuss how science while apparently neutral is part of cultural discourses which affect its constructions and classifications of gender and race the contributors examine how new cultural forms emerge from borrowings exchanges and intersections

across ethnic and cultural boundaries and conclude by investigating the contemporary experience of multiculturalism in an age of contested national borders and identities
